#	Main Topic	Comments	ScreenShot Links on GitHub
			https://github.com/nxkundu/WPL_PROJECT_S2018/tree/master/ScreenShot_sconnect_NKundu
	Project Structure	Designing the Project Structure. Each module has its own folder and each folder has its own index.php. This helps in only typing the module name to open the index.php in that folder. In future if we change the technology from PHP to JSP we just need to update index.php to index.jsp without needing to notify the User.	https://github.com/nxkundu/WPL_PROJECT_S2018/blob/master/ScreenShot_sconnect_NKundu/1_FolderSt1.png
		All the Data Operations are done inside data/[module-name] folder making it easy to separate the database calls from the UI	https://github.com/nxkundu/WPL_PROJECT_S2018/blob/master/ScreenShot_sconnect_NKundu/1_FolderSt2.png
		Also all the js, css, img are stored inside common folder static, making it easy for the browser to cache the static folder. static/js/[module-name]/abc.js static/css/[module-name]/abc.css static/img/abc.jpg	
1	Header / Footer	Designed all the Header Footer. Including before user logged in and after user logged in, handling the role / position of the user login in. Ex (Student / Faculty / Admin)	
2	Home Page	Designed the home Page.	https://github.com/nxkundu/WPL_PROJECT_S2018/blob/master/ScreenShot_sconnect_NKundu/2_HomePage.png
3	Signup	The Signup is on the home page, The signup form shows the list of university data which is fetched from the backend allowing the users to signup including Faculty and student	
4	Login	The Login is on the home page allowing the user to login for all the roles / position Including (Student/ Faculty/Admin)	
5	Faculty Attendance	Allows the Faculty to take the attendance of the class. Also this page shows the REAL Time attendance of the class as the students of the class submit their attendance.	https://github.com/nxkundu/WPL_PROJECT_S2018/blob/master/ScreenShot_sconnect_NKundu/8_FacultyAttendance.png
6	accountVerify	Whenever any user signup they receive a OTP in their email to verify the account. this page accepts the OTP sent in the email to verify the account	https://github.com/nxkundu/WPL_PROJECT_S2018/blob/master/ScreenShot_sconnect_NKundu/6_VerifyAccount.png
7	approveFeed	If the Privacy Settings of the user requires any feed to be approved by the User before it is displayed on the Feed of other user. Then this is the page when the user can approve or reject their Personalized Feed	https://github.com/nxkundu/WPL_PROJECT_S2018/blob/master/ScreenShot_sconnect_NKundu/3_ApproveFeed.png
8	approveUser	Only Admin and Faculty can approve any other Faculty as the signup of faculty requires two step of verification. 1. Email Verify and 2. The document or ID card uploaded by the faculty while sign up needs to be verified by the Admin or any other Faculty of that University	https://github.com/nxkundu/WPL_PROJECT_S2018/blob/master/ScreenShot_sconnect_NKundu/12_ApproveFaculty.png
9	Student Attendance	Worked on fetching the List of Courses and the course details for the student where the student is a student of the class	
10	attendanceTable	This page shows a table of the students and their attendance in each class with calculated percentage of Attendance	https://github.com/nxkundu/WPL_PROJECT_S2018/blob/master/ScreenShot_sconnect_NKundu/9_FacultyAttendanceTable.png

11	card_left	This is the left side of the screen showing the user details, which appears in all the screens	
12	card_right	This is the right side of the screen showing all the users of that particular university	
14	feed	This page is the main landing page when the user logs in. This page shows all the feed from different user based on the university and public. Feed may be text, photo and video. Also users of X university are not allowed to view feed of users of Y university unless the feed is public	https://github.com/nxkundu/WPL_PROJECT_S2018/blob/master/ScreenShot_sconnect_NKundu/4_LandingFeed.png
15	myFeed	This page list the feeds posted the User by themself	https://github.com/nxkundu/WPL_PROJECT_S2018/blob/master/ScreenShot_sconnect_NKundu/11_MyFeedMyPost.png
16	passwordReset	To reset the password. you will receive a new OTP EVERYTIME in email which is a 2-Factor Authentication	https://github.com/nxkundu/WPL_PROJECT_S2018/blob/master/ScreenShot_sconnect_NKundu/5_ResetPassword.png
17	searchProfile	Search user Profile based on the filters (University, Position, etc)	https://github.com/nxkundu/WPL_PROJECT_S2018/blob/master/ScreenShot_sconnect_NKundu/10_SearchUserAndFeed.png
18	searchFeed	Search user Feed based on the filters (University, Position, etc)	https://github.com/nxkundu/WPL_PROJECT_S2018/blob/master/ScreenShot_sconnect_NKundu/10_SearchUserAndFeed.png
19	viewFeed	View the single feed	https://github.com/nxkundu/WPL_PROJECT_S2018/blob/master/ScreenShot_sconnect_NKundu/7_FeedLikeComment.png
20	feedActivity	LIKE DISLIKE COMMENT on a feed	https://github.com/nxkundu/WPL_PROJECT_S2018/blob/master/ScreenShot_sconnect_NKundu/7_FeedLikeComment.png
21	session_logout.php	Handles logout	
22	session_verify_faculty.php	session verify faculty before loading each page	
23	session_verify_student.php	session verify student before loading each page	
24	session_verify_admin.php	session verify admin before loading each page	
25	connection_open.php	Common Php that opens the database connection	
26	connection_close.php	Common Php that close the database connection
